Subject: RE: Settlement

TO WHOM IT MAY CONCERN.....I believe the settlement that is being offered by Microsoft is a travesty. Microsoft has an monopoly that should have ended just like ATT's monopoly. Microsoft has too much power and it ignores the common people of this country. Microsoft is the worst example of corporate greed, excess and selfishness I've ever witnessed. Microsoft does nothing for the average citizen of this country except to fleece their pockets. The government has dropped the ball on this one. If the government had stuck to the original trial verdict the people of this country would have supported the decision. But political and financial interests corrupted the verdict and the government's ability to seem fair and unbiased. It has become increasingly apparent to me and others that the system is fixed. That there is little that the ordinary citizen can do to change it. I believe the politicians have corrupted our system and that no matter what we the people want (i.e.....look at the election, Gore won the popular vote but instead Bush is president), the Supreme Court has been corrupted.(there's something wrong when one of the judges sons works for Bush). I feel sorry for future generations. William C.Glines
